Rosewood Library - QLD

Product : Gen-Eco European Birch plywood was selected by FarFar Furniture to construct this unique tree made to-tally from plywood. Paul from FarFar used CNC technology to manufacture the tree in his factory and then transport and install at the new Rosewood Library. The tree is located in a dedicated children’s space.

Christie Downs School—Adelaide SA Gen-Eco European Birch plywood installed as wall panels.
 Architect : Brown Falconer Builder : FDC

USC Moreton Campus—Petrie QLD

Gen-Eco European Birch plywood was used extensively for the fit-out of the Sunshine Coast University campus. Both solid and perforated panels were installed as wall and ceiling panels throughout the building.

Versipanel utilising Hoop Pine imagery on FC panels for a non-combustible solution for soffit panels.

A variety of 7 different images were used to provide a more realistic result closely replicating natural plywood.

The use of CFC substrate provides a non-combustible solution for a public school installation
