

A modern commercial interior featuring a ceiling with horizontal wood slats and recessed lighting. A white marble reception desk with a black base is in the foreground. The background shows a wall of vertical wood slats and a glass partition. A black and wood chair is visible in the lower right corner.

COMMERCIAL INTERIORS

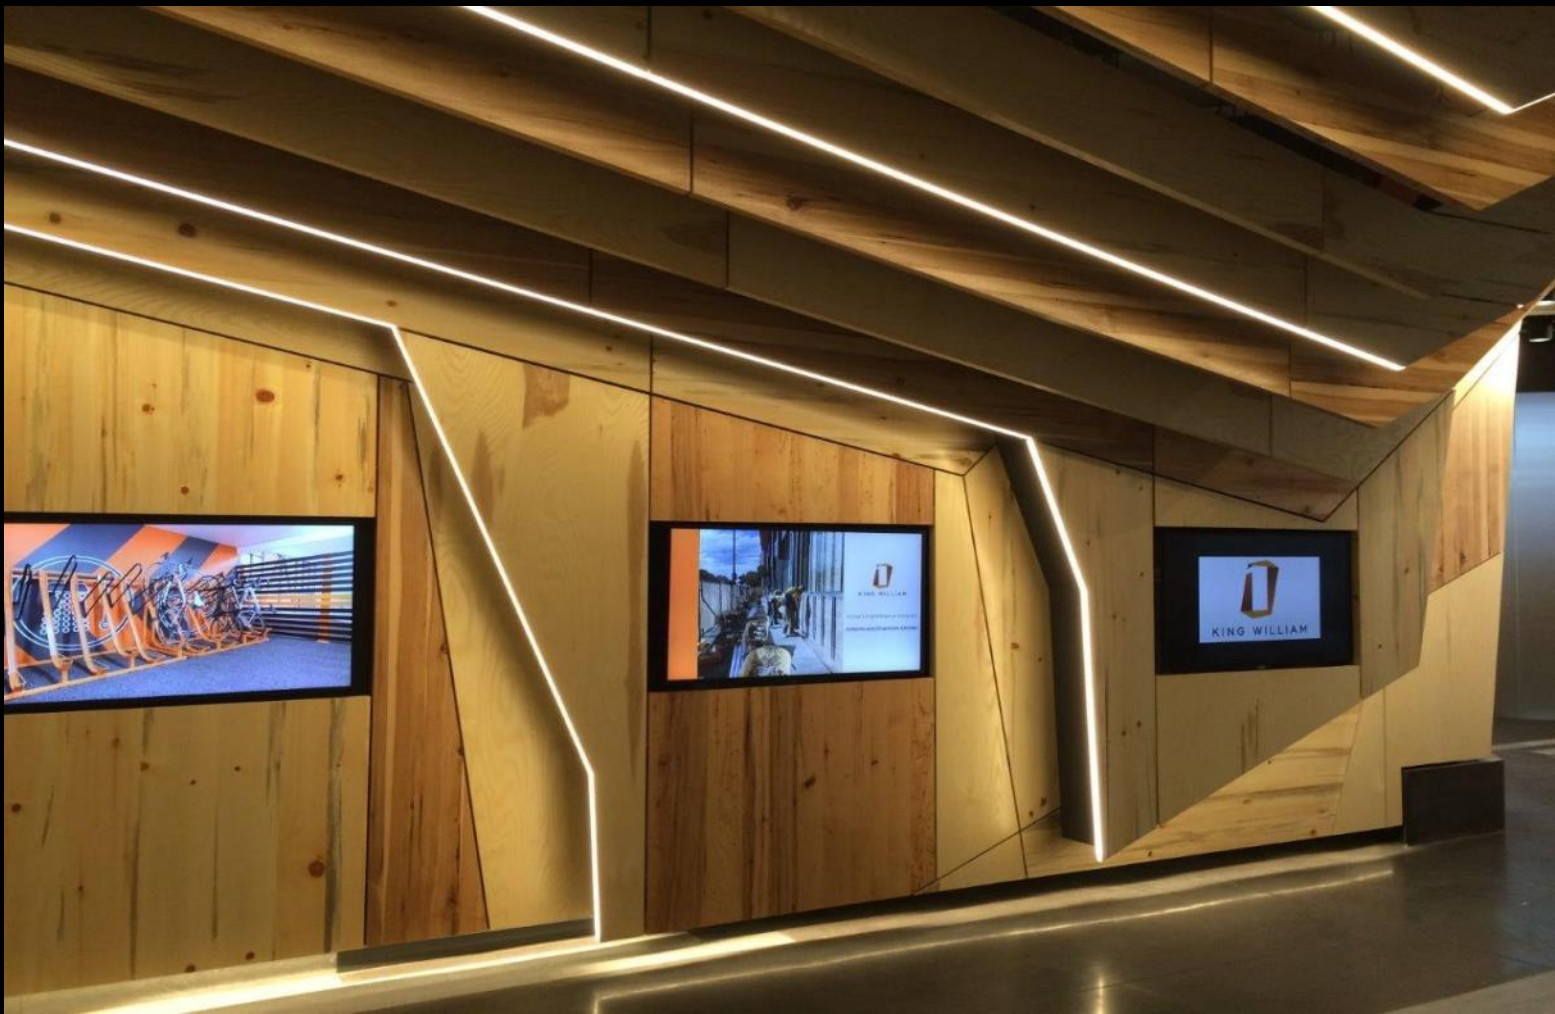

Herbert Smith Freehills Law Firm—Sydney

Our Ecolite beams and panels have been installed in many corporate offices across Australia. The Ecolite beams can be applied with many surfaces including digital print, natural timber veneer, laminate and paint.

With lightweight Balsa as the core material, Ecolite beams have distinct advantages in installation costs and the ability to create interesting profiles.
