

SUBSTRATE OPTIONS FOR DIGITAL PRINTING

We can print directly onto a wide variety of flat surfaces. This process often results in less people being involved in the installation process which in turn can produce cost savings.

Wood Based Panels

Balsa/MDF panels, Plywood, MDF, OSB & door faces

- **PVC Foamboard** (for semi-exposed areas)
- **Glass, Acrylic & Poly-Carbonate**
- **Compressed Fibre Cement** (external)
- **ACM Panels**
- **Laminate** (allowing for curved shapes)
- **Echopanel**

Gen-Ecolite Beams produced from Balsa/MDF

Brushed Aluminium ACM

Laminate (can be curved)

Oriented Strand Board

Fire Retardant MDF

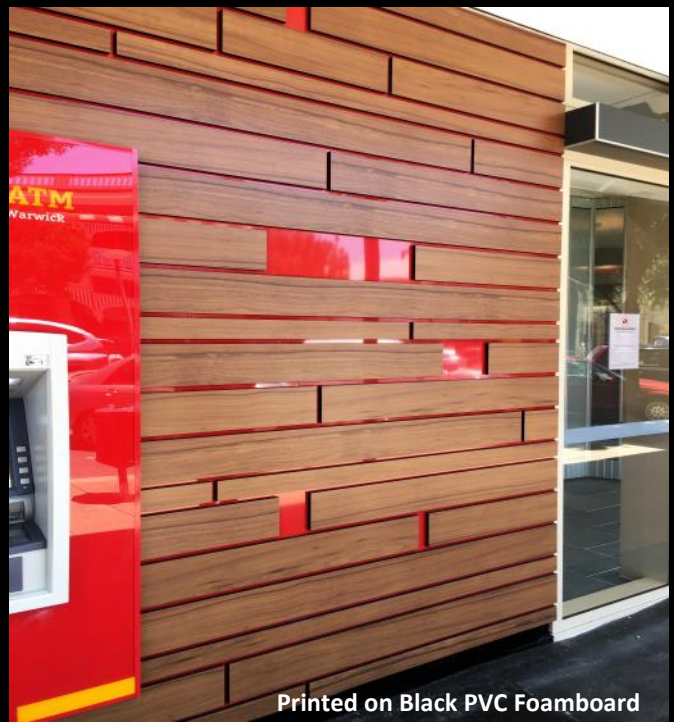

Echopanel

Plywood

Hoop Pine printed on 9mm FC panels

Printed on Black PVC Foamboard

Glass Balustrade

We can print using various formats including:

- **JPEG/TIFF** files
(highest resolution = best results)
- **VECTOR**
- **SCAN** (timber, fabric etc)

Often clients will supply images from stock libraries such as SHUTTERSTOCK or ISTOCK
