

SHOPFITTING SOLUTIONS

The shopfitting industry is a major segment within the building industry. Shopfitters are involved in the fit-out of clubs, cafes, restaurants, offices and major shopping centres.

Gen-Eco have supplied material for many of the projects mentioned above.

Here are a few examples.....

Installation of curved Ecolite beams—Brisbane Lions @ Springwood

BEFORE

AFTER

Before and after photos of Gen-Eco Bandy Ply used in the construction of food court seating at Westfield Shopping Centre—Chermside
Shopfitter—Unita

Before & After

Creative image of Breeze Block wall on Foamboard.

As the wall behind was solid, there was no need to install actual breeze blocks. The solution was to use our Creative Imagery process on Foamboard.

Project—Burrito Bar—Kawana QLD

Installed by Farrago Interiors

Designer—BB Retail Design

Project—Kivahan Coffee, Coorparoo

Whilst solid timber planks were used on the counter front, the shopfitter knew it would be too expensive to use them on the bulkhead. After scanning the original timber planks the image was applied to 12mm MDF panels.

A lightweight solution reducing cost and installation time.

Shopfitter—Building in Green

Designer—BB Retail Design

Project—Kiaan Health, Coomera QLD

The brief was to provide chunky 75mm beams that would match the flooring. The solution was to scan the floor boards and use the image on our Ecolite Balsa core beams.

A lightweight solution saving costs and providing the design brief required by the client.

Shopfitter—Woodland Shopfitting

Project—Coco Bliss, North Lakes

The brief was to use the corporate graphic of the client (Coco Bliss) as a tiled wall. The solution was to cut FC panels into 300 x 300mm tiles and apply the graphic image direct onto the surface of the FC. The tiles were then UV coated and tiles just like any normal ceramic tile.

A unique custom solution.

Shopfitter—Fix It Up

Project—Camera Pro, Newstead

The designer had the idea to shape the ceiling beams to replicate the iris of a camera lens.

Ecolite lightweight Balsa core beams were the solution.

Shopfitter—HiViz Projects
